Total Price to Customer

Terms of Agreement:

This agreement will become the basis of a subsequent order against the above referenced vendor's GoLearn contract(s).

The Period of Performance (POP) is indicated for each product/service being purchased. Unless otherwise noted, the POP runs on an annual basis. If this agreement is not renewed prior to the POP End Date, for the base year and each option year, the courseware and/or LMS licenses and services will be terminated.

Custom Learning Management Systems (LMS) will be delivered via an Application Service Provider (ASP) model. The ASP contractor will host and support the custom web-based LMS on their servers as well as provide necessary access to the users and technical support. In conjunction with the purchase of an LMS through GoLearn, hosting for the application, maintenance, and 24/7 help desk services are also purchased. The period of performance (POP) for LMS/LCMS shall be for one year with four additional one year options unless otherwise indicated.

All licenses (LMS, COTS or otherwise) are for a term of 12 months, *unless explicitly documented in the corresponding proposal and/or interagency agreement*. Solutions have a minimum licensing requirement. The total number of user names (active or suspended) represented in an LMS will determine the number of users on the LMS. OPM assumes

responsibility for compliance with Section 501 and 508 as it applied to the www.golearn.gov site and our out-of-the box, branded solutions. Agencies assume responsibility for 508 compliance for customizations made to the baseline branded solution; including, but not limited to: customizations to the LMS, customizations to COTS and custom content/courseware developed on or launched from an LMS procured through GoLearn (i.e. testing, QA, certification etc...). While the agency holds responsibility, GoLearn can provide customers with access to vendors that provide consulting services on 508 compliance and/or testing.

Additional:
